

CLAIM AMENDMENTS

1-12 (Canceled)

13. (New) A system in a watercraft for providing furnishings, in which system one or more prefabricated room units are arranged to be inserted into the watercraft, which water craft comprises one or more deck constructions, provided with support structures, and a board, **characterized** in that the board of the water craft is provided with an opening or an end, and in that the room units are arranged to be installed in the watercraft through the opening or the end into predetermined positions on the deck construction so that an exterior side portion of the room unit forms a part of the outboard of the watercraft and/or an interior side portion of the room unit forms a part of the interior board surrounding an open inner section of the watercraft.

14. (New) A system according to claim 13, **characterized** in that the room unit comprises one or more cabins, rooms or similar units.

15. (New) A system according to claim 13, **characterized** in that the exterior side portion and/or the interior side portion consists of a window, a wall and/or a balcony.

16. (New) A system according to claim 15, **characterized** in that the side portion is installed after the room unit has been moved into the watercraft.

17. (New) A system according to claim 13, **characterized** in that the width of the opening arranged in the board is smaller than the total width of two or more room units, when the room units are being taken into the watercraft.

18. (New) A system according to claim 13, **characterized** in that the sealing of the room unit/units is at least partially carried out by connecting the exterior side portion or the interior side portion directly to another exterior side portion or another interior side portion by means of separate cover strips or another sealing arrangement.

19. (New) A system according to claim 15, **characterized** in that the side portion includes a floor and/or a ceiling portion to be installed separately.

20. (New) A method for providing furnishings in a water craft, which watercraft comprises one or more deck constructions, provided with supporting structures, and a board, in which method one or more room units are installed into the watercraft, **characterized** in that one or more room units are installed on the deck construction through an opening or and end provided in the board of the watercraft, and in that the room units are moved into predetermined positions on the deck construction so that the an exterior side portion of the room unit forms a part of the outboard of the watercraft and/or an interior side portion of the room unit forms a part of the interior board of an open inner section of the watercraft.

21. (New) A method according to claim 20, **characterized** in that after the room unit has reached the predetermined position the exterior side portion is disposed, attached and/or sealed to the outboard and/or the interior side portion is disposed, attached and/or sealed to the interior board.

22. (New) A method according to claim 20, **characterized** in that a separate side portion is disposed, attached and/or sealed to the room unit or to the board.

23. (New) A method according to claim 20, **characterized** in that the room unit comprises one or more cabins, rooms or similar units and/or the side portion comprises one or more windows, walls and/or balconies.

24. (New) A method according to claim 20, **characterized** in that the room unit is moved aboard in the transverse direction (A) of the watercraft through the board of the watercraft without any substantial movement in the longitudinal direction (B) of the watercraft, so that the movement in the longitudinal direction (B) is preferably smaller than the width of the room unit.
